

Carlos Vera Diago

Data Analyst | SQL · DAX · Power Query | MBA

PROFILE

Data Analyst with 6+ years turning messy operational and financial data into decisions executives act on, across healthcare and financial services in Spain and Colombia. Built and owned BI reporting (Power BI, DAX, SAP/Odoo, Excel-based modeling) as a core part of every corporate role. Since 2026, running Miritai — a data and automation practice for small businesses — while extending that foundation into Azure/Fabric and the wider modern data stack.

SKILLS

- **Business Intelligence & Analytics:** Power BI (DAX), Looker Studio, Tableau, Advanced Excel, Power Query, ERP SAP
- **Data Engineering & Warehousing:** SQL (PostgreSQL, MySQL, SQL Server), Databricks, dbt Core, Snowflake, Google BigQuery, Python, Data Modeling, ETL/ELT Pipelines
- **Project Management Skills:** Agile & Delivery Jira, Confluence, Trello, GitHub Projects

WORK EXPERIENCE

Data Analyst, Miritai (Self-Employed)

May 2026 – Present

Remote

- Deliver Power BI dashboards, SQL-based reporting, and Power Query automation for small business clients, replacing manual spreadsheet processes with live, decision-ready reporting.
- Completed a full participant and engagement analysis for a cultural exchange program client, covering registration data, demographic segmentation, and engagement trends to inform future program planning.
- Built a self-directed portfolio of BI case studies published on GitHub (github.com/cgveradi) — a Power Query/DAX sales star-schema model, a Python-based hospital readmissions pipeline (BigQuery, Looker Studio), and a physician segmentation analysis (Python).

Operations Analyst, General Medical Care

Apr 2023 – Apr 2026

Tarragona, Catalonia, Spain · On-site

- Designed and maintained Power BI dashboards tracking productivity KPIs across 2 provinces — cut management reporting time by ~30% and surfaced bottlenecks previously invisible to leadership.
- Governed clinical databases in SAP ERP and Odoo across multiple medical centers, maintaining strong data integrity standards for personnel and patient-flow tracking.
- Streamlined SAP/Odoo reporting into consolidated SQL Server and Power BI dashboards, laying groundwork for a future migration toward Azure/Fabric cloud reporting.
- Acted as data translator for the executive team, synthesizing operational metrics into visual summaries that directly informed staffing and resourcing decisions.

Financial Data Analyst, Caja Promotora de Vivienda Militar y de Policía

Sep 2019 – Dec 2022

Bogotá, Colombia · On-site

- Built Excel-based valuation and projection models for high-net-worth client portfolios, with outputs used directly in executive investment presentations.
- Conducted data-driven due diligence and risk profiling, ensuring consistent adherence to KYC/AML banking regulations across the full client portfolio.
- Delivered recurring fiscal health reports and KPI dashboards to the executive team, translating complex financial data into strategic recommendations.

Operations Analyst, Médicos Emergencias S.C.

Jun 2015 – Jul 2019

Barcelona, Catalonia, Spain · Hybrid

- Consolidated fragmented operational data from multiple sources into a centralized internal database, improving data reliability and reducing reporting errors across departments.
- Tracked project budgets and timelines via Excel variance analysis, maintaining consistent adherence to fiscal targets across concurrent projects.
- Compiled and visualized weekly status reports for leadership, translating operational data into clear, actionable summaries.
